

East Contra Costa Irrigation District (ECCID) is a Groundwater Sustainability Agency in the East Contra Costa Subbasin.

For more information, keep reading or visit www.eccc-irwm.org/sgma.

The Sustainability Groundwater Management Act (“SGMA”), effective January 1, 2015, requires Groundwater Sustainability Agencies (“GSAs”) in high and medium priority basins to develop and implement a Groundwater Sustainability Plan (“GSP”). The intent of SGMA is for groundwater to be managed by local public agencies and GSAs to ensure a groundwater basin is operated within its sustainable yield through the development and implementation of a GSP.

On April 20, 2017, the East Contra Costa Irrigation District (ECCID) became a GSA and on May 9, 2017 entered into a Memorandum of Understanding (“MOU”) with seven other East Contra Costa GSAs to work together in the development of a GSP. The MOU may be viewed at <https://www.eccc-irwm.org/sgma-documents-reports>.

ECCID groundwater is located in the newly designated “East Contra Costa Subbasin.” The East Contra Costa Subbasin is designated a “medium-priority” basin.

The East Contra Costa Subbasin GSAs will provide periodic updates on the development of a GSP. For the latest news, past GSA meeting minutes, SGMA documents and reports, or to add your name to the interested parties list please visit <https://www.eccc-irwm.org/about-sgma>.

ECCID seeks public input and comments on the development of the GSP. Board meeting dates, times and agendas are located at: <https://www.eccid.org/meetings>.
